DGTR amends injury paragraph of hot-rolled steel initiation on China, Japan, Russia

Case No. AD (OI)-24/2026 · Corrigendum · August 19, 2026

The Directorate General of Trade Remedies has issued a corrigendum notification dated August 19, 2026 in the anti-dumping investigation concerning imports of "Hot Rolled Flat Products of Alloy or Non-Alloy Steel" originating in or exported from China, Japan and Russia (Case No. AD (OI)-24/2026, SETU Case ID AD/OI/028/2026).

The investigation was initiated by notification F. No. 6/26/2026-DGTR dated June 25, 2026. The corrigendum modifies paragraph 23 of that initiation notification, which concerns the assessment of injury to the domestic industry on the basis of the information furnished by the applicants.

As modified, paragraph 23 states that the applicants have furnished prima facie evidence establishing that the subject imports have caused injury to the domestic industry. It records the applicants' claim that the volume of imports increased in absolute terms and in relation to demand in India over the injury period, and states that the subject goods were undercutting the domestic industry's prices and that the subject imports suppressed and depressed those prices. It further states that the domestic industry's average inventory increased despite increased sales, and records the applicants' claim that dumped imports had an adverse impact on its profitability parameters, including a decline in return on investment.

Measure	Anti-dumping
Stage	Corrigendum
Case number	Case No. AD (OI)-24/2026

Gazette ID	CG-DL-E-22082026-275672
Product	Hot Rolled Flat Products of Alloy or Non-Alloy Steel
Countries	China, Japan, Russia
Findings	• The corrigendum modifies paragraph 23 of the initiation notification issued vide F. No. 6/26/2026-DGTR dated June 25, 2026.

- As modified, paragraph 23 states that the applicants have furnished prima facie evidence establishing that the subject imports have caused injury to the domestic industry.
- The applicants claim that the volume of imports increased in both absolute terms and in relation to demand in India over the injury period; the paragraph also states that the subject goods were undercutting the prices of the domestic industry and that the subject imports suppressed and depressed those prices.
- The paragraph states that, despite increased sales, the average inventory of the domestic industry increased, and records the applicants' claim of an adverse impact on the domestic industry's profitability parameters, including a decline in return on investment, due to dumped imports.
