DGTR corrects duty unit to US$/KM in copper data cables anti-dumping findings on China

Case No. AD (OI) – 39/2025 · Corrigendum · October 21, 2026

The Directorate General of Trade Remedies has issued a corrigendum notification dated October 21, 2026 in the anti-dumping investigation concerning imports of "Copper Data Cables" originating in or exported from China (Case No. AD (OI) – 39/2025). It corrects the Final Findings Notification No. 6/44/2025-DGTR dated September 16, 2026.

A typographical error had occurred in the duty table appended to paragraph 111 of the final findings: the unit of measurement was inadvertently mentioned as "MT" instead of "KM". Paragraph 111 is therefore substituted. In the substituted duty table the amounts are in US$/KM, and Note 1 states that the commodity is traded in kilometers (KM) and that the recommended anti-dumping duty should be collected in this unit.

As substituted, paragraph 111 recommends anti-dumping duty equal to the lesser of the margin of dumping and the margin of injury, for a period of 5 years from the date of the notification to be issued by the Central Government. The duty is NIL for ZTC Technology (Suzhou) Co., Ltd., Jinhua Guanyang Electronic Technology Co. Ltd., Zhejiang Chaolian Electronic Co., Ltd. and Ningbo Excellence Communicated Connector Co., Ltd., and 86 US$/KM for any other producer in China and for goods originating in any country other than China exported from China. The product is all structured copper data cables, including CAT 5e, CAT 6, CAT 6A, CAT 7, CAT 7A and patch cords, under heading 854449.

The individual NIL rates apply only on presentation to the customs authorities of a valid commercial invoice carrying a declaration, dated and signed by an official of the entity issuing it, that the goods were manufactured by the named producer; otherwise the duty applicable to all other producers applies. The corrigendum is signed by Amitabh Kumar, Designated Authority.
