ANTI-DUMPING / INITIATION

# DGTR initiates anti-dumping investigation on cyanuric chloride from China and EU

DGTR initiated an anti-dumping investigation on June 30, 2026 into cyanuric chloride from China and the European Union, case AD/OI/035/2026.

THE DIRECTORATE GENERAL of Trade Remedies has initiated an anti-dumping investigation concerning imports of Cyanuric Chloride originating in or exported from China and the European Union (Case No. AD/OI/035/2026). The initiation notification is dated June 30, 2026 and was issued on an application by Superform Chemistries Limited, which claims to be the sole producer of the product in India.

CASE No. AD/OI/035/2026 · Initiation · June 30, 2026

The Directorate General of Trade Remedies has initiated an anti-dumping investigation concerning imports of Cyanuric Chloride originating in or exported from China and the European Union (Case No. AD/OI/035/2026). The initiation notification is dated June 30, 2026 and was issued on an application by Superform Chemistries Limited, which claims to be the sole producer of the product in India.

Cyanuric Chloride (2,4,6-Trichloro-1,3,5-triazine) is a white crystalline chemical intermediate, generally traded at 99% purity, used mainly in agrochemicals, pharmaceuticals, and dyes and pigments. It has no dedicated tariff code and is imported under 2916 39 90, 2933 39 90, 2933 69 10, 2933 69 90 and 2933 71 00, which are indicative only.

The period of investigation is April 1, 2025 to March 31, 2026; the applicant had proposed April to December 2025. The injury period covers 2022-23, 2023-24, 2024-25 and the period of investigation. The applicant alleges a significant dumping margin, rising imports, price depression, single-digit capacity utilization and financial losses.

The Authority will determine the existence, degree and effect of the alleged dumping and recommend a duty adequate to remove injury, if one is warranted. Interested parties are to file submissions and questionnaire responses on the SETU portal within 37 days of the notice of initiation being communicated to them or to the diplomatic representative of the exporting country, and comments on product scope and PCN methodology within 15 days.

| Product | Cyanuric Chloride |
| What it covers | The product under consideration is Cyanuric Chloride, also known as 2,4,6-Trichloro-1,3,5-triazine or Trichlorotriazine: a white crystalline |

| | |
|---|---|
| | organic compound generally traded in one form with 99% concentration (purity). It is a reactive chemical intermediate used mainly in the agrochemicals, pharmaceuticals, and dyes and pigments industries. The applicant has not proposed any PCN methodology. |
| Customs codes | 2916 39 90, 2933 39 90, 2933 69 10, 2933 69 90, 2933 71 00 |
| Countries | China, European Union |
| Applicant | Superform Chemistries Limited |
| Period of investigation | 1st April 2025 to 31st March 2026 (12 months) |
| Injury period | Financial years 2022-23, 2023-24, 2024-25 and the period of investigation |
| Findings | • The applicant claims to be the sole producer of the subject goods in India, and the Authority is satisfied that it constitutes domestic industry and satisfies the standing requirements of Rule 5(3).<br>• For China, the applicant claims non-market economy treatment and, submitting that cost and price data for a market economy third country are not available, a normal value based on the price paid or payable in India; for the European Union, it claims a normal value constructed from the best estimates of cost of production with selling, general and administrative expenses and a reasonable profit margin. Both methodologies were considered for initiation.<br>• Export price was based on the CIF price in DG System transaction-wise import data, and the comparison at ex-factory level prima facie shows a dumping margin above the de minimis level and significant.<br>• The applicant has provided prima facie evidence that subject imports increased in absolute and relative terms, that price depression prevented it from recovering full cost and a reasonable return, and that it uses its capacity only in single digits and operates at a financial loss, with negative cash profit and negative return on capital employed. |
| Recommendation | The Authority initiates an anti-dumping investigation under Section 9A of the Act read with Rule 5 of the AD Rules to determine the existence, degree and effect of the alleged dumping and to recommend the amount of anti-dumping duty which, if levied, would be adequate to remove the injury to the domestic industry. |
| Time limits | • Interested parties to upload information, in confidential and non-confidential versions, on the SETU portal under case ID AD/OI/035/2026: within 37 days from which notice of initiation is |

communicated to the identified interested parties, or transmitted to the appropriate diplomatic representative of the exporting country

- Comments on the scope of the product under consideration and the PCN methodology: within 15 days, running concurrently with the time limit in the initiation notification
- Requests for extension of time: at least one day before the original deadline
- Comments on issues of confidentiality: within 7 days from the date of circulation of the non-confidential version of the documents
