DGTR opens anti-dumping investigation into moulded soda-lime glass vials from China

SETU Case ID – AD/OI/ 031/2026 · Initiation · June 30, 2026

The Directorate General of Trade Remedies has initiated an anti-dumping investigation, by notification dated June 30, 2026 (SETU Case ID – AD/OI/ 031/2026), concerning imports of Moulded Soda-Lime Glass Vials originating in or exported from China.

The application was filed by PGP Glass Limited, which states it accounts for around 34.65% of Indian production; with the supporting producer Neutral Glass & Allied Industries Private Limited, the share is around 97.36%. The product covers Type-II and Type-III soda-lime pharmaceutical vials of 5ml to 30ml, in flint and amber, used for injectable medicines, vaccines and similar products. Borosilicate Type-I vials, tubular vials and vials outside the 5ml to 30ml range are excluded. The product is classified under tariff item 7010 90 00, which is indicative only.

The period of investigation is April 1, 2025 to March 31, 2026, and the injury period covers the three financial years from April 1, 2022 to March 31, 2025 and the period of investigation. Normal value for China was constructed from estimated costs of production. The Authority finds prima facie evidence of a dumping margin above de minimis, an absolute increase in subject imports, price suppression and depression, and an adverse effect on profitability.

Interested parties must register on the SETU portal and file questionnaire responses within 37 days from circulation of the non-confidential version of the application. The Authority will determine the existence, degree and effect of dumping and recommend any duty needed to remove injury.

Measure	Anti-dumping
Stage	Initiation
Case number	SETU Case ID – AD/OI/ 031/2026
File number	F. No. 6/28/2026-DGTR
Dated	June 30, 2026
Published in the Gazette	June 30, 2026
Put online	July 4, 2026
Gazette ID	CG-DL-E-04072026-274121
Product	Moulded Soda-Lime Glass Vials
What it covers	Pharmaceutical glass vials made from soda-lime glass conforming to Type-II and Type-III specifications, in flint (clear) and amber,

	restricted to a capacity of 5ml to 30ml, used to store injectable medicines, vaccines, antibiotics, biologics and similar preparations. Excluded are Type-I borosilicate glass vials of all sizes, Type-II and Type-III moulded soda-lime vials above 30 ml or below 5 ml, and tubular glass vials. The applicant proposed five PCNs by vial capacity (5/7.5/8 ml, 10 ml, 15 ml, 20 ml and 30 ml), and the unit of measurement is pieces.
Customs codes	7010, 7010 90 00
Countries	China
Applicant	PGP Glass Limited, supported by Neutral Glass & Allied Industries Private Limited ("NGAI" or "Gerresheimer")
Period of investigation	1st April 2025 to 31st March 2026 (12 months)
Injury period	1st April 2022 to 31st March 2023, 1st April 2023 to 31st March 2024, 1st April 2024 to 31st March 2025 and POI
Findings	• The applicant states it accounts for around 34.65% of Indian production of the subject goods in the POI, and with the supporting producer around 97.36%; the Authority considers it an eligible domestic industry under Rule 2(b) and finds Rule 5(3) satisfied. • The applicant initially proposed a nine-month period of investigation (April 1, 2025 to December 31, 2025); the Authority adopted the revised twelve-month period the applicant later proposed. • The applicant claims China should be treated as a non-market economy; normal value was constructed on best available estimates of cost of production, adjusted for a reasonable profit margin. • A comparison of normal value and export price at ex-factory level prima facie shows a dumping margin above the de-minimis level. • The volume of subject imports has increased in absolute terms, there is evidence of price suppression and depression, and the imports have had an adverse impact on the profitability parameters of the domestic industry.
Recommendation	The Authority initiates an anti-dumping investigation under Section 9A of the Act read with Rule 5 to determine the existence, degree and effect of dumping and to recommend an appropriate amount of anti-dumping duty adequate to remove the injury to the domestic industry.
Time limits	• Comments on the scope of the product under consideration and PCN methodology: a 15-day period, running concurrently with the time limit for submissions

- Questionnaire responses and other submissions, confidential and non-confidential versions, on the SETU portal (case ID AD/OI/031/2026): within 37 days from the date on which the non-confidential version of the application is circulated by the Authority or transmitted to the diplomatic representative of the exporting country
- Requests for extension of time: at least one day before the original deadline
- Comments on issues of confidentiality: within 7 days from the date of circulation of the non-confidential version of the documents
