ANTI-DUMPING / SUNSET REVIEW INITIATION

DGTR opens sunset review of anti-dumping duty on DCC from China

DGTR opens a sunset review of the anti-dumping duty on N,N′-dicyclohexyl carbodiimide (DCC) from China, which is in force till April 27, 2027.

THE DIRECTORATE General of Trade Remedies has initiated a sunset review of the anti-dumping duty on imports of N,N′-Dicyclohexyl Carbodiimide (DCC) originating in or exported from China, by notification dated September 30, 2026 (SETU Case ID AD/SSR/013/2026).

DGTR opens sunset review of anti-dumping duty on DCC from China

SETU CASE ID - AD/SSR/013/2026 · Sunset review initiation · September 30, 2026

The Directorate General of Trade Remedies has initiated a sunset review of the anti-dumping duty on imports of N,N′-Dicyclohexyl Carbodiimide (DCC) originating in or exported from China, by notification dated September 30, 2026 (SETU Case ID AD/SSR/013/2026).

The duty was recommended in final findings dated February 24, 2022 and imposed by Notification No. 12/2022-Customs (ADD) dated April 28, 2022. It is in force till April 27, 2027. The review was sought by Clean Science and Technology Limited, the sole Indian producer, which accounts for 100% of Indian production in the period of investigation.

DCC is a dehydrating reagent used to couple amino acids in peptide synthesis and in making pharmaceuticals, including antiretroviral APIs, and cosmetics. The product scope is unchanged from the original investigation. The period of investigation is April 1, 2025 to March 31, 2026, and the injury period covers 2022-23, 2023-24, 2024-25 and the period of investigation.

For initiation, normal value was constructed from the domestic industry's costs and compared with DGCI&S-based export prices; the comparison shows, prima facie, a negative dumping margin. The applicant alleges that dumping and injury would recur if the duty lapsed, citing surplus and idle capacity in China, the export orientation of Chinese producers and the likely diversion of exports to India because of trade restrictive measures imposed by the United States on imports from China. The Authority finds sufficient prima facie evidence of a likelihood of recurrence of dumping and injury and will examine whether expiry of the duty is likely to lead to it. Interested parties are to respond on the SETU portal within 37 days.

Measure	Anti-dumping
Stage	Sunset review initiation
Case number	SETU CASE ID - AD/SSR/013/2026
File number	F. No. 7/26/2026-DGTR
Dated	September 30, 2026
Published in the Gazette	September 30, 2026
Put online	October 9, 2026
Gazette ID	CG-DL-E-09102026-276976
Product	N,N′-Dicyclohexyl Carbodiimide (DCC)
What it covers	Dicyclohexylcarbodiimide, also known as N, N'-Dicyclohexyl Carbodiimide, DCC and 1, 3-Dicyclohexylcarbodiimide (CAS 538-75-

	0), a colorless to pale yellow organic compound in liquid or semi-solid form used mainly to couple amino acids in peptide synthesis; the scope is the same as in the original investigation. The customs classification is indicative only and not binding on the scope.
Customs codes	2925 1900, 2925 2990, 2921 2990, 2924 1900, 2924 2990, 2925 2910, 2933 3990, 2941 9090
Countries	China
Applicant	Clean Science and Technology Limited
Period of investigation	1st April 2025 – 31st March 2026
Injury period	2022-23, 2023-24, 2024-25 and the period of investigation
Findings	• The applicant is the sole producer of the subject goods in India and accounts for 100% of Indian production during the period of investigation; it has not imported the subject goods from China and imported a negligible quantity from the United States, which is not a subject country. • Normal value for China was constructed for initiation from the domestic industry's cost of production, adjusted for selling, general and administrative expenses, with a reasonable profit margin; export price was taken from DGCI&S CIF data, adjusted to ex-factory level. • The comparison at ex-factory level shows, prima facie, that the dumping margin is negative for the subject goods imported from China. • The applicant claims that subject import volumes declined after the duty, that landed prices fell over the injury period, that Chinese producers hold surplus and idle capacities exceeding demand in China and India and are export-oriented, and that United States trade measures on China are likely to divert exports to India. • The Authority notes sufficient prima facie evidence of likelihood of recurrence of dumping and consequent injury to the domestic industry if the existing duty ceases.
Recommendation	The Authority initiates a sunset review under Section 9A(5) of the Act read with Rule 23(1B) of the Rules to examine whether expiry of the existing anti-dumping duty on DCC from China is likely to lead to recurrence of dumping and consequent injury. The review covers all aspects of the final findings dated February 24, 2022.
Time limits	• Comments on the product under consideration and proposed PCNs, if any: within 15 days from the date of transmission of the intimation letters, running concurrently with the main time limit

- Interested parties to upload confidential and non-confidential submissions on the SETU portal under case ID AD/SSR/013/2026: within 37 days from the date on which the non-confidential version of the application would be circulated by the Authority or transmitted to the appropriate diplomatic representative of the exporting country, as per Rule 6(4) of the Rules
- Comments on issues of confidentiality: within 7 days from the date of circulation of the non-confidential version of the documents
- Requests for extension of time: at least one day before the original deadline
