ANTI-DUMPING / FINAL FINDINGS

DGTR recommends anti-dumping duty of USD 290 per MT on monoisopropylamine from China

DGTR's final findings of February 23, 2026 recommend an anti-dumping duty of USD 290 per MT for five years on monoisopropylamine (MIPA) from China.

THE DIRECTORATE GENERAL of Trade Remedies has issued final findings dated February 23, 2026 in its anti-dumping investigation into imports of Monoisopropylamine (MIPA) originating in or exported from China (Case No. AD (OI) - 43/2024). The investigation was initiated on December 30, 2024 on an application by M/s Alkyl Amines Chemicals Limited, which accounts for 100% of eligible domestic production. The period of investigation is July 1, 2023 to June 30, 2024.

DGTR recommends anti-dumping duty of USD 290 per MT on monoisopropylamine from China

Case No. AD (OI) - 43/2024 · Final findings · February 23, 2026

The Directorate General of Trade Remedies has issued final findings dated February 23, 2026 in its anti-dumping investigation into imports of Monoisopropylamine (MIPA) originating in or exported from China (Case No. AD (OI) - 43/2024). The investigation was initiated on December 30, 2024 on an application by M/s Alkyl Amines Chemicals Limited, which accounts for 100% of eligible domestic production. The period of investigation is July 1, 2023 to June 30, 2024.

MIPA is an organic amine used in glyphosate and atrazine herbicides, as a regulating agent for plastics and as an intermediate in the organic synthesis of coating materials, plastics, pesticides, rubber chemicals and pharmaceuticals. It is imported under subheadings 2921 11 90, 2921 19 90 and 2921 19 20, which are indicative only. An earlier anti-dumping duty on the product from China applied until March 20, 2023.

No Chinese producer or exporter cooperated. The Authority constructed normal value from the domestic industry's costs and found a dumping margin in the range of 35-45%. It found that imports rose sharply and undercut domestic prices, with price undercutting in the range of 25-35% in the period of investigation, and that they caused declines in the domestic industry's production, sales, market share and profitability. It held that imports from the USA were not a cause of injury. The injury margin is in the range of 10-20%.

Applying the lesser duty rule, the Authority recommends a duty of USD 290 per MT on imports from China, and on goods of other origin exported from China, for five years from the date of the Central Government's notification. An appeal lies before the Customs, Excise and Service Tax Appellate Tribunal.

Measure	Anti-dumping
Stage	Final findings
Case number	Case No. AD (OI) - 43/2024
File number	F. No. 6/46/2024-DGTR
Dated	February 23, 2026
Published in the Gazette	February 23, 2026
Put online	February 24, 2026
Gazette ID	CG-DL-E-24022026-270424
Product	Monoisopropylamine (MIPA)

What it covers	The product under consideration is 'Monoisopropylamine', also known as 'MIPA', an organic amine produced in anhydrous (99.5%) form and sold in both anhydrous and aquatic (diluted) form. It is used in glyphosate and atrazine herbicide formulations, as a regulating agent for plastics, as an intermediate in organic synthesis and as an additive in the petroleum industry. Two product control numbers were used, MIPA Bulk and MIPA Packed.
Customs codes	2921 11 90, 2921 19 90, 2921 19 20
Countries	China
Applicant	M/s Alkyl Amines Chemicals Limited
Period of investigation	1st July 2023 to 30th June 2024 (12 months)
Injury period	April 2020 to March 2021, April 2021 to March 2022, April 2022 to June 2023 and the POI
Findings	• No producer or exporter from China cooperated; M/s Anhui Haoyuan Chemical Group Co., Ltd. registered and then withdrew, and was treated as non-cooperative. • Normal value was constructed from the optimized cost of production of the domestic industry, and export price was determined from DGCI&S data; the dumping margin for any producer from China is in the range of 35-45%. • Price undercutting in the POI is in the range of 15-25% for bulk, 25-35% for packed goods and 25-35% overall. • Imports increased sharply in absolute and relative terms in the POI, and the domestic industry suffered price suppression and depression, steep declines in production, capacity utilization, domestic sales and profitability, higher inventory and a loss of market share. • An earlier anti-dumping duty under Notification No. 14/2018-Cus (ADD) applied until March 20, 2023; the sunset review final findings of December 20, 2022 found likelihood of continuation or recurrence of dumping and injury, but the duty was not continued. • Imports from the USA, which were only in bulk form, at a far higher price than bulk imports from China and declining in volume, were held not to be a cause of injury; no factor other than dumped imports was found to have caused injury. • The injury margin is in the range of 10-20%. • The price impact of the duty on Glyphosate 41% and Atrazine (50%) Technical is below 2% in both cases.

Recommendation	The Authority recommends anti-dumping duty equal to the lesser of the dumping margin and the injury margin on imports of Monoisopropylamine originating in or exported from China, at USD 290 per MT, for 5 years.
Duty expressed as	Fixed amount in USD per MT
For how long	A period of 5 years from the date of notification to be issued in this regard by the Central Government
What happens next	The recommended duty is for 5 years from the date of the notification to be issued in this regard by the Central Government. An appeal against the determination in these final findings lies before the Customs, Excise and Service Tax Appellate Tribunal.

The duty table

Country	Producer	Duty
China PR (country of origin), exported from any country including China PR	Any producer	USD 290 per MT
Any country other than China PR (country of origin), exported from China PR	Any producer	USD 290 per MT
