DGTR

DCC sunset review keeps its scope; replies due November 29

DGTR keeps the scope of its sunset review of anti-dumping duty on DCC from China, adopts no PCNs, and moves questionnaire replies to November 29, 2026.

THE DIRECTORATE GENERAL of Trade Remedies (DGTR), Department of Commerce, issued this notice to all interested parties on November 11, 2026 (F. No. 7/26/2026-DGTR, SETU Case ID AD/SSR/013/2026). It concerns the sunset review of the anti-dumping duty on N, N′-Dicyclohexyl Carbodiimide (DCC) from China, which DGTR started on September 30, 2026. Onkar Nath Mishra, Assistant Director, signed it with the approval of the Designated Authority.

Notice on scope of PUC/PCN and extension of time, F. No. 7/26/2026-DGTR

DCC sunset review keeps its scope; replies due November 29

DGTR · November 11, 2026

The Directorate General of Trade Remedies (DGTR), Department of Commerce, issued this notice to all interested parties on November 11, 2026 (F. No. 7/26/2026-DGTR, SETU Case ID AD/SSR/013/2026). It concerns the sunset review of the anti-dumping duty on N, N′-Dicyclohexyl Carbodiimide (DCC) from China, which DGTR started on September 30, 2026. Onkar Nath Mishra, Assistant Director, signed it with the approval of the Designated Authority.

DGTR told the known interested parties on October 8, 2026 to file questionnaire responses and any comments on the scope of the product under consideration (PUC) and proposed product control numbers (PCNs). No party commented on the scope or the PCNs, and the domestic industry proposed no PCN methodology. So DGTR keeps the PUC as defined in the original investigation, without any change.

Questionnaire responses, including the Exporter Questionnaire Response (EQR), were due by November 14, 2026. After requests from interested parties, DGTR has granted 15 more days, so the new deadline is November 29, 2026. It says it'll grant no further extension, as trade remedy investigations are time bound. The notice gives no finding on dumping or injury.

Under the initiation notification (Gazette CG-DL-E-09102026-276976), DCC (CAS 538-75-0) is used mainly to couple amino acids in artificial peptide synthesis. The applicant is Clean Science and Technology Limited, the sole Indian producer, and the period of investigation is April 1, 2025 to March 31, 2026. The duty under review was imposed by Notification No. 12/2022-Customs (ADD) of April 28, 2022, on final findings of February 24, 2022, and is in force until April 27, 2027. The review asks whether letting it expire is likely to lead to continued or renewed dumping and injury.

Issued by	Directorate General of Trade Remedies, Department of Commerce, Ministry of Commerce & Industry
Document	Notice on scope of PUC/PCN and extension of time, F. No. 7/26/2026-DGTR
