DGTR

Pentaerythritol probe keeps its scope; replies due November 25

DGTR keeps the scope of its pentaerythritol anti-dumping probe on Russia unchanged, adopts no PCN, and moves questionnaire replies to November 25, 2026.

THE DIRECTORATE GENERAL of Trade Remedies (DGTR), Department of Commerce, issued a notice dated November 4, 2026 (F. No. 6/61/2026-DGTR, SETU Case ID AD/OI/062/2026) to all interested parties. It settles the scope of the product under consideration (PUC) and the Product Control Number (PCN) methodology in the anti-dumping investigation into "Pentaerythritol" originating in or exported from Russia. DGTR began the investigation by Initiation Notification F. No. 6/61/2026-DGTR dated September 25, 2026, on the application of Kanoria Chemicals & Industries Limited and Perstorp Industries India Private Limited. The notice is signed by Rahul P., Deputy Secretary.

Notice on scope of the product under consideration and PCN methodology, F. No. 6/61/2026-DGTR, SETU Case ID AD/OI/062/2026

Pentaerythritol probe keeps its scope; replies due November 25

DGTR · November 4, 2026

The Directorate General of Trade Remedies (DGTR), Department of Commerce, issued a notice dated November 4, 2026 (F. No. 6/61/2026-DGTR, SETU Case ID AD/OI/062/2026) to all interested parties. It settles the scope of the product under consideration (PUC) and the Product Control Number (PCN) methodology in the anti-dumping investigation into "Pentaerythritol" originating in or exported from Russia. DGTR began the investigation by Initiation Notification F. No. 6/61/2026-DGTR dated September 25, 2026, on the application of Kanoria Chemicals & Industries Limited and Perstorp Industries India Private Limited. The notice is signed by Rahul P., Deputy Secretary.

DGTR circulated the non-confidential version of the application to the known interested parties on October 6, 2026, and gave them 15 days from then to comment on the scope and propose a PCN methodology. No party commented on the scope in that time. DGTR therefore confirms the scope as notified at initiation, without any change, and asks all parties to file their questionnaire responses on that scope. The product is "Pentaerythritol", excluding Di-Pentaerythritol. The notice repeats the initiation text: Pentaerythritol is produced in technical grade and nitration grade, and it is classified under sub-heading 2905.42, HSN code 2905.42.90. That classification is indicative only and does not bind the scope. The unit of measurement is metric tons (MT).

The applicants proposed no PCN methodology at initiation and no interested party proposed one, so DGTR adopts none for this investigation. The notice says it settles the scope only for running the investigation. Any party may still argue about the scope during the investigation, including asking for a particular product to be excluded, if it backs the request with relevant information and evidence. DGTR will decide the scope of the product for any measure it may recommend after examining the information and evidence on record.

The notice set November 11, 2026 as the date for questionnaire responses and said no further extension would be granted. A second letter, dated November 6, 2026 and issued under the same file number, extends that date to November 25, 2026 after requests from certain interested parties. It says no further extension will be granted. Neither document gives any finding on dumping or injury, and neither mentions the period of investigation. The initiation notification gives that period as April 1, 2025 to March 31, 2026.

Issued by	Directorate General of Trade Remedies, Department of Commerce, Ministry of Commerce & Industry
Document	Notice on scope of the product under consideration and PCN methodology, F. No. 6/61/2026-DGTR, SETU Case ID AD/OI/062/2026
