DGTR

Persulfates probe keeps three PCNs; replies due November 28

DGTR keeps the scope and three PCNs in its anti-dumping probe on persulfates from China, and moves questionnaire replies to November 28, 2026.

THE DIRECTORATE GENERAL of Trade Remedies (DGTR), Department of Commerce, issued this notice to all interested parties on November 11, 2026 (F. No. 6/47/2026-DGTR, SETU Case ID AD/OI/050/2026). It concerns the anti-dumping investigation into imports of "Persulphates" from China, which DGTR started on September 30, 2026. Onkar Nath Mishra, Assistant Director, signed it with the approval of the Designated Authority.

Persulfates probe keeps three PCNs; replies due November 28

DGTR · November 11, 2026

The Directorate General of Trade Remedies (DGTR), Department of Commerce, issued this notice to all interested parties on November 11, 2026 (F. No. 6/47/2026-DGTR, SETU Case ID AD/OI/050/2026). It concerns the anti-dumping investigation into imports of "Persulphates" from China, which DGTR started on September 30, 2026. Onkar Nath Mishra, Assistant Director, signed it with the approval of the Designated Authority.

DGTR told the known interested parties on October 7, 2026 to file questionnaire responses and any comments on the scope of the product under consideration (PUC) and the proposed product control number (PCN) methodology. No party commented, so DGTR adopts the PUC and PCN methodology as notified in the initiation notification, without any change. The PCNs are Ammonium Persulphate (APS), Potassium Persulphate (PPS) and Sodium Persulphate (SPS).

Questionnaire responses, including the Exporter Questionnaire Response (EQR), were due by November 13, 2026. After requests from interested parties for more time, DGTR has granted 15 more days, so the new deadline is November 28, 2026. It says it'll grant no further extension, as trade remedy investigations are time bound. The notice gives no finding on dumping or injury.

Under the initiation notification (Gazette CG-DL-E-08102026-276936), the product is peroxosulphates, also called persulphates, made as three alkali metal salts with the formulas (NH4)2S2O8, K2S2O8 and Na2S2O8. All three are used as an initiator and oxidizing agent in the textile and chemical industries. They're classified under subheading 2833 40 00 and also imported under 2833 29 90, a classification that is indicative only. The applicants are Calibre Chemicals Private Limited and UI-VR Private Limited, and they proposed April 1, 2025 to March 31, 2026 as the period of investigation.

Issued by	Directorate General of Trade Remedies, Department of Commerce, Ministry of Commerce & Industry
Document	Notice regarding PUC/PCN methodology and extension of time, F. No. 6/47/2026-DGTR
Dated	November 11, 2026
Case	Anti-dumping investigation, SETU Case ID AD/OI/050/2026
Product	Persulphates (peroxosulphates): ammonium, potassium and sodium persulphate; subheadings 2833 40 00 and 2833 29 90 (indicative)
Country	China
Applicants	Calibre Chemicals Private Limited and UI-VR Private Limited

Initiation	September 30, 2026 (Gazette CG-DL-E-08102026-276936)
Comments on PUC/PCN	None received
PCNs	Ammonium Persulphate (APS), Potassium Persulphate (PPS) and Sodium Persulphate (SPS), as notified at initiation
Questionnaire responses	Due November 28, 2026 (was November 13, 2026); no further extension
Period of investigation	April 1, 2025 to March 31, 2026, as proposed by the applicants
Signed by	Onkar Nath Mishra, Assistant Director
